

Seid Cubro

seidcubro754@gmail.com / 570-290-0010 / Avoca, PA

Summary

IT Coordinator at Evercor Facility Management graduating from Wilkes University in December 2026 with a B.S. in Cloud Computing and minors in Computer Science and Data Science. Hands-on experience deploying virtualized infrastructure, automating business systems, and administering networks and endpoint security. Independently built and launched PriorLine, a public machine learning analytics platform. Leads cloud architecture planning for an industry-supported RF signal classification senior project. Seeking cloud computing and infrastructure opportunities starting January 2027.

Experience

Information Technology Coordinator

Evercor Facility Management • Wyoming, PA

05/2026 - Present

- Manage IT infrastructure and security across multiple locations, supporting virtualized systems, network connectivity, endpoint administration, and employee access.
- Built automated Python and REST API integrations connecting business systems, reconciling financial data, and delivering operational reports with minimal ongoing intervention.
- Deployed a virtualized PostgreSQL environment with automated data ingestion and business intelligence dashboards, centralizing operational data and improving visibility into key performance indicators.
- Executed network upgrades and subnet migration; administer endpoint protection, patching, encryption, device provisioning, and access controls across Windows and iOS environments.
- Developed automated receivables reporting and data-driven pricing analysis to support collections, financial accuracy, and operational decision-making.

Package Handler / Package Handler Trainer

FedEx Ground • Pittston, PA

03/2022 - 05/2026

- Supported high-volume logistics operations through accurate package handling, adherence to safety procedures, and team coordination.
 - Served as Package Handler Trainer from August 2024 to August 2025, assisting management, onboarding employees and providing hands-on coaching on operating procedures.
-

Projects & GitHub

GitHub: <https://github.com/seidcubro>

Technical Portfolio: <https://seidcubro.com>

PriorLine: <https://priorline.io>

PriorLine — Machine Learning Analytics Platform

Independent Developer | Live Public Platform

- Independently designed, built, and launched a full-stack NFL analytics platform, delivering the database, data pipelines, predictive models, and public web interface.
- Developed Python and PostgreSQL workflows for data ingestion, transformation, feature engineering, and model training.
- Implemented Random Forest regression to generate player projections and compare predictions with published prop lines.

- Integrated analytical dashboards and model documentation, using Docker and Git/GitHub to support reproducibility and ongoing development.

RF Signal Analysis — Senior Capstone

Cloud Infrastructure Lead | Wilkes University | In Progress

- Lead cloud architecture planning within a three-student team developing an RF signal analysis system with RADX and G2CPU stakeholders.
- Design Amazon S3 storage and versioning for large RF datasets; evaluate EC2 compute options to accelerate model training.
- Plan AWS IAM permissions, least-privilege access, secure lab-to-cloud connectivity, and credential lifecycle management.
- Define version control, deployment, and CI/CD workflows to support collaborative development and reproducible delivery.

Technical Portfolio — React Web Application

- Built and deployed a responsive React portfolio showcasing technical projects and experience, with source code maintained in Git/GitHub.

Technical Skills

Cloud & Infrastructure

AWS fundamentals; Amazon S3, EC2, and IAM architecture planning; Linux; Windows; virtualization; Proxmox; Docker fundamentals; cloud storage and compute.

Automation & Data

Python; pandas; SQL; PostgreSQL; REST APIs; ETL pipelines; scheduled automation; data integration and validation; business intelligence dashboards.

Networking & Security

TCP/IP; subnetting; wireless networking; endpoint protection; patch management; encryption; access controls; least-privilege principles; secure connectivity.

Development & Delivery

Git/GitHub; PowerShell; React; JavaScript; CI/CD concepts; application deployment; debugging; technical documentation.

Analytics & Operations

Machine learning; feature engineering; KPI reporting; financial reconciliation; pricing analysis; infrastructure troubleshooting; cross-functional project coordination.

Education

B.S. Cloud Computing

Wilkes University • Wilkes-Barre, PA

12/2026

Minors: Computer Science and Data Science

Relevant Coursework: Cloud Computing Practicum, Data Science Practicum, Networks and Security, C and Unix, Data Structures and Algorithms, Object-Oriented Programming, Web Development, Machine Learning and AI

GED

Pittston Area Senior High School • Yatesville, PA

06/2022

- Gifted education program
 - Student Government: Sophomore Class Secretary, Junior Class President
-

Languages

English, Spanish, Romanian, Bosnian

Clearance/Citizenship

U.S. Citizen. Open to positions requiring an employer-sponsored security clearance.
